

# Learning Solutions

...That create the L.I.V.E experience

## Learn in an Integrated and Virtual Environment!

Liquid Krystal's learning solutions comprise unique courseware, strategic alliances and learner-focused technology applications. Delivered through Liquid Krystal's technology platform, they help learners across the 'Learning Time Circle'! These solutions reach learners across a wide canvas – in academic markets, and through government projects or non-profits. We also deliver solutions to learners in corporations. Our solutions address their critical learning needs, be it for corporate induction or for boot camps. Liquid Krystal is a recognized thought leader in the learning space, particularly in the eLearning domain.

Liquid Krystal has its own in-house development team of specialists, who have several person years of experience working on IT learning tools. This team of Group Project Heads and Technical Creators are an integral part of the project teams that design, develop and administer Liquid Krystal's indigenous technologies.

### Riding the wave...

And, right on time too! Liquid Krystal moved into the South Asia markets at the right time. India, China, Sri Lanka and other countries are developing their own knowledge hubs, thanks to emerging political practices and strong technology practices. Liquid Krystal has formed strategic alliances and partner programs with leading course, library and certification providers. Every offering is a solution to a particular issue. And, comes cost efficiently, cost effectively

Interestingly, when product practices are moving more towards solutions, Liquid Krystal's strategy appears well-timed!

**Helping learners build technical expertise...**

**Helping learners develop subject strengths...**

**Helping learners learn in a collaborative environment...**

## Driven by the O.P.E.N learning practice!

In brief, Liqwid Krystal's platforms are ubiquitous and stimulating, offering learning and growth opportunities to its users. The learning solutions are total: They comprise learning and assessment, with certification and job match processes in the pipe. Simply put, our solutions offer a multi-national learning environment, with courseware and books drawn from the best in the global publishing industry. Very often, you would come across names like Pearson, IBM Press, Peachpit, O'Reilly or even Addison-Wesley (all majors in the tech publishing space). The major components – learning, referencing and assessment are available as a package or even individually. Courses, books and tests can be picked, bundled and basketed, according to specific learning requirements. These learning requirements based on industry, background and profiles – be it IT/ITeS/Enterprise/Academic/Government/Non-Profit.

rRapidSuite is Liqwid Krystal's suite of offerings for the industry. With modules for learning, assessment and profile2role matching, rRapidSuite customizes a mix and match of courses according to industry requirements, project profiles and onshore/offsite requirements. The assessment platform allows for assessment, and works with partner job boards for questions banks.

**Call us up for a demo – Today!**

rRapidSuite-Safari® is a strategic partnership that provides about 3500 business and tech books to corporate users at a price point, that's as brilliant as it can get. It also has an Online Help Desk, which is very critical to the employee onsite. All this for just a few hundred dollars per corporate license!

CodeSaw, Liqwid Krystal's award-winning, patent-pending innovation is based on the common learning platform:

Observe | Practice | Evaluate | Network

In brief, it's learning in the new age, but based on traditional practices! With a growing user base of over 400,000 users, CodeSaw powers our own learning platforms across markets. By integrating CodeSaw into our platform, we allow learners to 'Learn by Actual Doing' – the most practical approach to learn programming. This is Liqwid Krystal's USP, because, worldwide, till date, there is nothing like CodeSaw. It's a real Saw that helps you saw 'Code'.

**To see how you can help your programming teams 'Learn by Actual Practice', call us – Today!**

# Indigenous Technologies | Global Platform

Being a pro in global and industry-relevant technical skill sets is a passport to cross borders in a global sourcing environment. Supplementing induction training or lateral learning connects employees to essential learning.
