

We know the feeling!

According to a recent survey by The Ridge Group, professionals in the tech space spend 350 hours per year on an average, searching for information. Collaborating with colleagues or relying on one piece of erroneous code from a questionable source can contribute to time consuming delays and expensive rework.

What exactly are the hidden costs of the productivity that's lost when workers spend hours ploughing their way through loads of unfiltered, unauthenticated information. Focused learning requires learners to delve deep and engage in mapping knowledge to ideas and execution.

- How do organizations respond to rapidly escalating costs of information overload?
- How can companies enable a rapid shift to electronic information access?
- How can readers, researchers and learners differentiate between tons of data that appears the same?

Liquid Krystal presents 'The Safari® Difference'

Safari® in partnership with Liquid Krystal [Value-added Resellers for India and other Asian geographies in the academic and industry markets] offer Safari Books Online at attractive prices for the India markets!

Read, don't rummage!

Safari®'s powerful search engine helps users search for thousands of books simultaneously online. Users report that Safari® saves them an average of 13.5 hours per month or just over 4 labor-weeks per year. For an enterprise with 500 technology workers that translates to savings of 30 times or more the cost of Safari® per year.

Electronic Reference Libraries for Programmers & other IT/ Technology/ Business Professionals.

Subscription at enterprise level to Safari®, grants each user in your organization FULL access to every book in the 3500 book strong eLibrary with no limits on usage. Infact, over 80 per cent of Safari® content has been published since 2000, be it on desktop applications, business skills and IT. More importantly, the use of XML standards ensure that all the three libraries can be integrated seamlessly into most Learning Management Systems, Knowledge Management Systems and Enterprise Information Portals.
